DAVID QUINTERO
WEB DEVELOPER

ABOUT

I am a creative and passionate web developer ready to contribute, add value, and continue to grow my programming, problem solving and design skillsets alongside a team that values commitment, integrity and a growth mindset. My portfolio can be experienced at davidquintero.dev — I am trained in the MongoDB, Express, React and Node.js stack. I am proficient in the CSS Grid and Flexbox modules as well as proper semantic use of HTML5.

EXPERIENCE

2021   **HomeWorks**
A FULL-STACK LEAD GENERATION & CRM APP
- Commissioned by a home remodeling and services company, HomeWorks allows a customer to request services at their service address. The app organizes the request by dates and keeps track of the flow from initial contact, estimate and service completion. It features a testimonial system, use of the Google Maps API, real-time updates, authentication & authorization, i18n language internationalization and a mobile-first responsive layout.

2018   **PRENSAME.COM**
DEVELOPER / CURATOR
- Prénsame was a Spanish language publication with a complete social media profile. It encouraged users to submit their own writing on culture, society and technology and featured a contributor payment system depending on the length of the article submitted. The platform was setup with WordPress and several specialized plugins. Following surpassed the 10.000 users on Instagram and Twitter combined.
